DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the system of claims 11-12, 19 and 22 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: reference to claims 10, 12, 15 and 18, on pages 9 and 10, should not be made in the specification. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 5, 15-18, 20-22 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Regarding claims 5, 21 and 22, the specification fails to define "an optimal Field-of-View". Regarding claims 15-17, and 20 the specification fails to define "lower geometric distortion region," as well as "a higher geometric distortion region." Regarding claim 18, the specification fails to define "an accurate geometrical position of the FOV."

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6-8, 11-12 and 15-17, 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 6-8, "said fiducial

Art Unit: 3737

markers" lacks antecedent basis. Regarding claim 11, the term "at least one fiducial marker" is only set forth in the preamble and therefore does not appear to be part of the claimed invention; however, the body of the claim defines structure in terms of the unclaimed marker. Claim 15, fails to disclose merging the obtained first and second MR images, which is considered to be an essential part of the disclosed invention, and is therefore incomplete.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claims 15-18 and 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 15-18 and 20 are generic to a computer readable medium which can be a signal.

Allowable Subject Matter

9. Claims 2-4 and 9 are allowed.

10. Claims 6-8, 11, 12 and 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Response to Arguments

11. Applicant's arguments filed September 23rd, 2009 have been fully considered but they are not persuasive. Regarding drawing objections, claims 11-12, 19 and 22 are directed to an apparatus. Figures 1-3 are directed to a method of magnetic resonance imaging and do not disclose an apparatus. Regarding claims 5, 15-18, and 20-22, "an

Art Unit: 3737

optimal Field-of-View," "lower geometric distortion region," "higher geometric distortion region," and "an accurate geometrical position of the FOV" are terms essential to the basis of the invention. The specification fails to provide an example to sufficiently define these terms to prevent undue experimentation. Regarding claim 15, merging the first and second images is considered to be an essential part of the disclosed invention and is therefore incomplete.
